Prerequisites: Anatomy and Physiology

PURPOSE AND OUTCOME

Course Overview: The purpose of this course is to provide the student with basic understanding of pathophysiology as a change from normal physiological functioning of the various systems of the human body and to understand the implications it has on broader aspects of daily living. The course is based on illness and disease within a human body systems framework. Emphasis is on select conditions most often encountered by occupational therapists and other health professionals. The course focuses on critical thinking used to analyze the signs and symptoms based on understanding the pathophysiological mechanisms and integration of knowledge.

Relation to Program Outcomes: This is a required course for Junior students in the BHS program.

Course Objectives and/or Goals

The student is expected to perform the following:

1. Apply physiological principles to understanding pathophysiological processes within the systems of the human body.
2. Understand the differences between physiological functioning and pathophysiological processes in the various systems of the human body.
3. Analyze the relationships among signs and symptoms and pathophysiological processes of selected illnesses and diseases in adults.
4. Apply critical thinking to analyze presentations of signs and symptoms based on the underlying pathophysiological processes.

Instructional Methods

Recorded lecture videos, live lecture, group presentations, course texts, Visible Body software and notes posted on Canvas. Much of the course material will be delivered in a **blended learning** format.

What is blended learning and why is it important?

A Blended Learning class uses a mixture of technology and face-to-face instruction to help you maximize your learning. Knowledge content that, as the instructor, I would have traditionally presented during a live class lecture is instead provided online before the live class takes place. This lets me focus my face-to-face teaching on course activities designed to help you strengthen higher order thinking skills such as critical thinking, problem solving, and collaboration. Competency in these skills is critical for today's health professional.

What is expected of you?

You are expected to actively engage in the course throughout the semester. You must come to class prepared by completing all out-of-class assignments. This preparation gives you the knowledge or practice needed to engage in higher levels of learning during the live class sessions. If you are not prepared for the face-to-face sessions, you may struggle to keep pace with the activities occurring in the live sessions, and it is unlikely that you will reach the higher learning goals of the course. Similarly, you are expected to actively participate in the live class. Your participation fosters a rich course experience for you and your peers that facilitates overall mastery of the course objectives.

Attendance

It will be very difficult to succeed in this course without regular attendance. While a significant portion of the course materials is presented before class using a flipped format, class time provides opportunity for clarifying the material, identifying key information, and connecting concepts. For that reason, regular attendance is mandatory. Make-up work/information will be provided **only** for excused absences approved prior to class or in extenuating circumstances, using the following procedures.

Excused Absences: Email the professor **at least 72 hours before you anticipate missing class**. Students with an approved absence will be provided with make-up work and/or opportunity to access information shared in class on the day missed.

Extenuating Circumstances: Occasionally, there circumstances such as illness or a personal emergency that cannot be anticipated. In these circumstances, students are expected to email the professor at the earliest opportunity. Students should identify the days missed and any days they anticipate missing in the future as a result of the circumstance. **Students must email within 1 week of the missed class date to receive access to make-up work/class information.**

All faculty members are bound by the UF policy for excused absences. For information regarding the UF Attendance Policy see the Registrar website for additional details:
<https://catalog.ufl.edu/ugrad/current/regulations/info/attendance.aspx>

Inclusive Learning Environment

Public health and health professions are based on the belief in human dignity and on respect for the individual.
